- January 21, 2020 – First confirmed US case in Washington State.
- December 31, 2019 – First confirmed case of COVID-19 in Wuhan, China.

MONTEREY COUNTY IS AT STAGE 3 OF THE SHELTER IN PLACE

Governor Gavin Newsom today unveiled the Blueprint for a Safer Economy, a statewide, stringent and slow plan for living with COVID-19 for the long haul. The plan imposes risk-based criteria on tightening and loosening COVID-19 allowable activities and expands the length of time between changes to assess how any movement affects the trajectory of the disease.

Like every aspect of California's response, data and science are the North Star, and as a result, this new framework makes a number of changes to the state's previous resilience roadmap.

Californians can go to covid19.ca.gov to find out where their county falls and what activities are allowable in each county.

"This Blueprint is statewide, stringent and slow," said Governor Newsom. "We have made notable progress over recent weeks,

but the disease is still too widespread across the state. COVID-19 will be with us for a long time and we all need to adapt. We need to live differently. And we need to minimize exposure for our health, for our families and for our communities."

The Blueprint builds on lessons learned from the first six months of the disease – and the new scientific understanding that has been collected – to create a new system for regulating movement and COVID-19 transmissions. It includes:

1. At least 21 days to expand activities beyond the initial tier to ensure California better limits the spread of the virus;
2. Mandatory metrics – case rates and test positivity – to measure how widespread COVID-19 is in each county and guide what is allowed;
3. A uniform state framework, with four categories instead of 58 different sets of rules;
4. A more nuanced way of allowing activity: Instead of open vs. closed, sectors can be partially opened and progressively add to their operations as disease transmission decreases; and
5. A new process for tightening back up again quickly when conditions worsen.

The updated guidance can be found at <https://covid19.ca.gov/>.
